linear algebra with a data science bent

linear algebra + numpy, scipy, etc.

preparation for ML, data science, graphics,...

not geometric algorithms in the traditional sense

see course schedule for full details

Course Structure

material is on the course website

discussion + announcements are on Piazza

submission + grading is on Gradescope

Lectures

Lectures

» We will not take attendance in lectures, but it is highly recommended that you attend

Lectures

- » We will not take attendance in lectures, but it is highly recommended that you attend
- » If something is said in lecture and not on Piazza there is **no excuse for missing the information**

Lectures

- » We will not take attendance in lectures, but it is highly recommended that you attend
- » If something is said in lecture and not on Piazza there is **no excuse for missing the information**
- » Barring technical issues, lectures will be **recorded**

Workshops

Five lectures are labeled as **workshops**, where there will be an in-class activity

We drop your lowest workshop grade (e.g., you're allowed to miss one)

see course schedule for more details

Programming

Programming

Yep, we'll be using **Python** and a collection of libraries (see the course webpage for details)

Programming

Yep, we'll be using **Python** and a collection of libraries (see the course webpage for details)

We will assume access to a shell. The best option is to use **VSCode**

Programming

Yep, we'll be using **Python** and a collection of libraries (see the course webpage for details)

We will assume access to a shell. The best option is to use **VSCode**

If you're on Windows, we require that you instal a WSL environment

Workload

2 lectures / week

1 assignment (written) / week

1 lab / 2 weeks

1 quiz / 2 weeks

3 exams (2 midterms, final)

Grading

10% Assignments (11 total, 1 dropped)

10% Labs (5 total, 1 dropped)

10% Workshops (5 total, 1 dropped)

20% Quizzes (5 total, 1 dropped)

30% Midterm Exams (2 total)

20% Final Exam

Assignments

Assignments

» Assignments are written at-home evaluations

Assignments

- » Assignments are written at-home evaluations
- » Assignments are due weekly by 8:00PM on Thursdays, one week after the release date. No late submissions (the submission will be open until 11:59PM, with no penalty)

Assignments

- » Assignments are written at-home evaluations
- » Assignments are due weekly by 8:00PM on Thursdays, one week after the release date. No late submissions (the submission will be open until 11:59PM, with no penalty)
- » Assignments are submitted via **Gradescope**.

- » You will have a chance to start them during your discussion section
- » They are graded on participation like assignments
- » We will automatically drop your lowest lab score

Quizzes

Quizzes

» Quizzes are every other week during your discussion section

Quizzes

- » Quizzes are every other week during your discussion section
- » They'll consist of a small collection of written questions similar to homework assignments

Quizzes

- » Quizzes are every other week during your discussion section
- » They'll consist of a small collection of written questions similar to homework assignments
- » We'll drop your lowest quiz score

Anything else?

This is just an outline. **You must read the entire course manual**

Please contact me as soon as possible if you need disability accommodations

Don't hesitate to suggest how to make this course better

Generative AI

Generative AI

You'll notice that this course puts a lot of weight on in-class evaluation...

Generative AI

You'll notice that this course puts a lot of weight on in-class evaluation...

This is so we can maintain the policy: *Generative AI is allowed for assignments and labs*

Generative AI

You'll notice that this course puts a lot of weight on in-class evaluation...

This is so we can maintain the policy: *Generative AI is allowed for assignments and labs*

That said, use your best judgment.

Generative AI

You'll notice that this course puts a lot of weight on in-class evaluation...

This is so we can maintain the policy: *Generative AI is allowed for assignments and labs*

That said, use your best judgment.

Generative AI is great for studying, but *you can't use it for quizzes and exams*

Lastly...

Lastly...

We're human (you are too)

Lastly...

We're human (you are too)

It's important to meet people where they are

Lastly...

We're human (you are too)

It's important to meet people where they are

We're here to help you succeed, we take this seriously

Lastly...

We're human (you are too)

It's important to meet people where they are

We're here to help you succeed, we take this seriously

This course is always changing, some things work, some don't
